SQL Databases

EDUCATION

Advanced Degree Multiplatform Software Development (CFGs)

CPIFP Los Enlaces (Zaragoza)

2021-2023

During my higher education, I acquired proficiency in various technologies and working methodologies. The primary technologies I learned encompassed .NET, Java, HTML, XML, and SQL, along with the utilization of various integrated development environments (IDEs).

For my final degree project, I worked with .NET Maui, .NET, SQL, as well as Azure and SignalR, which earned me an honorable mention.

LANGUAGES

English: **Advanced (CEFR B2)**

Spanish **Native**

PROFILE

Full Stack Developer with experience in C#, .NET, Angular, TypeScript, and SQL. Specialized in the design and development of web and mobile applications, both frontend and backend, using modern and scalable architectures.

I regularly work in agile environments following Scrum methodologies, which allows me to collaborate effectively with multidisciplinary teams and adapt quickly and efficiently to changes.

I stand out for my collaborative approach and mindset focused on continuous learning. I enjoy contributing innovative solutions.

Currently, I am expanding my tech stack with languages like Go, Python, Swift, and Android, reinforcing my commitment to continuous improvement. I also strive to balance technical and creative aspects by dedicating part of my time to photography, video games, and outdoor activities.

WORK EXPERIENCE

Full Stack Developer

  Hiberus (Zaragoza, Spain) January 2025 - Present

I am part of the development team at SPORTIUM, where I work on feed listeners—systems responsible for receiving and processing live data from external providers, such as odds, results, and real-time events for sports betting platforms. I also contribute to the development of new microservices to enable new functionalities on the websites, aiming to improve the system's scalability and performance. Additionally, I work on frontend components using Angular, within a Full Stack approach based on .NET and Angular technologies.

Full Stack / Mobile Developer

 Integra Tecnología (Zaragoza, Spain) July 2023 - December 2024

In my current role, I specialize in developing mobile and web applications using .NET Maui for mobile apps and .NET MVC for web apps. My primary focus is on designing and implementing robust and efficient architectures for backend development with .NET 7. Additionally, I have experience in creating dynamic and appealing user interfaces using Angular.

I also have knowledge in implementing Azure Functions for service development and deploying applications to the App Store and Play Store.

Software Development Internship

 Integra Tecnología (Zaragoza, Spain) March 2023 - June 2023

During my internship, I contributed to the development of an enterprise web application designed for activity management. I worked with key technologies, including Angular, Bootstrap, and PrimeNG for the frontend, and .NET on the backend. My focus was on implementing various functionalities such as file import and export, SMTP email sending, and token and refresh token management.

This experience allowed me to apply my skills in a real-world setting and participate in the creation of a comprehensive enterprise solution.
